

New Digital Control

New Hand Held Remote

# AromaSteam Sauna

**NO PERMANENT INSTALLATION!  
NO PLUMBING!**

The new AromaSteam capsule steam sauna is completely portable -- plugs into any standard 110V outlet! Sets up and disassembles in minutes without tools. Assembles in about 10 minutes.

Then just add a quart of distilled water (and a few drops of aromatherapy essential oils if desired) and get ready for minutes of relaxing, soothing, pampering aromatic steam bath!

Reaches 115-130 degrees F with a warm-up time of about 5-10 minutes.

**LOGISTICS:** Set up your AromaSteam steam sauna in any indoor location that's within 10 to 12 feet of a standard electrical outlet. Minimum floor space required for AromaSteam Serene: 44" x 44". Because the water pot in the base is totally self-contained and does not leak, you can put your AromaSteam steam sauna on any type of floor. Condensation on the wall and door runs down the sides and back into the sump in the base of the unit so that it can be emptied after your steam session. **NOTE:** Room temperature affects the potential steam temperature. The AromaSteam is designed for a minimum of 60 degrees F room temperature.

**CARE:** The AromaSteam is very easy to care for. Just wipe clean after each use. The unit is made of nonporous materials that do not promote the growth of mold or fungus. The use of distilled water prevents water spots.

**Unit Dimensions:**

43" diameter

66" height
